

VITICUSGROUP™
WVC ANNUAL CONFERENCE
MARCH 2 - 5, 2025 | LAS VEGAS, NV

2025 EXHIBIT HALL & EDUCATION PROGRAM

BIG ANNOUNCEMENT
HEAR IT FIRST AT SUNDAY'S GENERAL SESSION!

MESSAGE FROM BOARD PRESIDENT

Collaboration, Passion, and a Legacy of Excellence

Serving as the first-ever Credentialed Veterinary Technician (CVT) to hold the prestigious position of Viticus Group Board President has been a career-defining honor. This role, highly respected across the veterinary industry, comes with great responsibility, and I am deeply grateful for the opportunity to lead. The experience has been profoundly inspiring, filled with valuable lessons and remarkable moments.

As a long-time supporter of Viticus Group, I've witnessed the transformative power of continuing education in veterinary medicine. By fostering environments where CVTs are recognized, supported and given opportunities to grow through tailored learning experiences, the veterinary industry can not only elevate the profession but also improve all that we do in our practice. Through exceptional programs like the WVC Annual Conference and hands-on training at Viticus Group's state-of-the-art education centers, we are paving the way for enhanced patient care and professional growth. Our playful yet professional approach empowers veterinary professionals to take their expertise to the next level.

With nearly a century of leadership in veterinary education, Viticus Group is poised to continue shaping the future of animal healthcare for the next 100 years. Exciting developments lie ahead, and as a valued WVC Annual Conference participant, you will be at the forefront of these advancements.

As my presidency comes to a close, I want to express my heartfelt gratitude to each of you for your dedication to your patients, peers, and the veterinary profession. Thank you for being part of the Viticus Group family and attending the 97th WVC Annual Conference with us. Here's to an incredible experience and an even brighter future!

Respectfully,

Heather Prendergast, RVT, CVPM, SPHR
2024 Board President | Viticus Group

INSIGHTS FROM THE CEO

Practice Makes Almost Perfect – Game On!

The journey of growth – it's a never-ending game, isn't it? There are several starts and stops throughout a career, which all become the game pieces of a professional life. Each of us can improve our playmaking and develop ourselves at every opportunity, and, in nearly 100 years, that is precisely what Viticus Group sets out to do year-in and year-out for the veterinary industry.

With that, we've learned a few things along the way.

- **Don't ever stop leading with a growth mindset:** We have an insatiable hunger to level up our skills and we are growing our programs and offerings to satisfy that need.
- **Do recognize that it takes time and practice:** There is a critical need to enhance hands-on training, which boosts the confidence in our colleagues to deliver comprehensive care and we provide the training environments to build that confidence.
- **Don't turn away assistance to complete the task at hand:** This is the core of why we do what we do, and we are here to support you through to hitting the finish line.
- **Do unlock new possibilities:** Seek and take advantage of opportunities where innovative education welcomes you – you belong there, and we are here to expand your exploration and press start on new learning adventures together.

Apply these takeaways as you continue your quest for knowledge at WVC Vegas and beyond. Our compass leads us to the path of embracing challenges and growth begins at the edge of our comfort zone.

Smart. Serious. Fun. THIS is what Viticus Group is all about!

Thank you for choosing WVC Vegas as your premier veterinary education conference. We welcome you and are grateful to be a part of your success!

Andrea Davis

Chief Executive Officer | Viticus Group

- + Delicious, beef-flavored soft chew makes compliance easy and enjoyable
- + The same proven dose of afoxolaner prescribed to millions of dogs
- + Delivers an optimized dose of moxidectin that is safe and effective
- + Safe for use in puppies as young as 8 weeks, weighing 4 pounds or more

Contact your Boehringer Ingelheim Representative to learn more

IMPORTANT SAFETY INFORMATION: NexGard® PLUS (afoxolaner, moxidectin, and pyrantel chewable tablets) is for use in dogs only. The most frequently reported adverse reactions reported in clinical trials were diarrhea, vomiting, lethargy, and itching. NexGard PLUS contains afoxolaner, a member of the isoxazoline class, which has been associated with neurologic adverse reactions including tremors, ataxia, and seizures in dogs with or without a history of seizures. Use with caution in dogs with a history of seizures or neurologic disorders. The safe use of NexGard PLUS has not been evaluated in breeding, pregnant, or lactating dogs. Dogs should be tested for existing heartworm infection prior to starting a heartworm disease preventive. For more information, see full prescribing information or visit NexGardPLUSClinic.com.

NexGard® PLUS

(afoxolaner, moxidectin, and pyrantel chewable tablets)

For oral use in dogs only.

CAUTION: Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Description:

NexGard® PLUS (afoxolaner, moxidectin, and pyrantel chewable tablets) is available in five sizes of beef-flavored, soft chewables for oral administration to dogs and puppies according to their weight. Each chewable is formulated to provide minimum doses of 1.14 mg/lb (2.5 mg/kg) afoxolaner, 5.45 mcg/lb (12 mcg/kg) moxidectin, and 2.27 mg/lb (5.0 mg/kg) pyrantel (as pamoate salt).

Afoxolaner is a member of the isoxazoline family of compounds. Its chemical name is 1-Naphthalene-carboxamide, 4-[5-[3-chloro-5-(trifluoromethyl)-phenyl]-4,5-dihydro-5-(trifluoromethyl)-3-isoxazolyl]-N-[2-oxo-2-[(2,2,2-trifluoroethyl)amino]ethyl].

Moxidectin is a semisynthetic macrocyclic lactone derived from the actinomycete *Streptomyces cyaneogriseus nancyangensis*. The chemical name for moxidectin is (6R,23E,25S(E))-5-O-Demethyl-28-deoxy-25-(1,3-dimethyl-1-butenyl)-6,28-epoxy-23-(methoxyimino) milbemycin B.

Pyrantel is a member of the tetrahydropyrimidine family of compounds. Its chemical name is (E)-1,4,5,6-Tetrahydro-1-methyl-2-[(2-thienyl)vinyl]pyrimidine 4,4'-methylenebis[3-hydroxy-2-naphthoate](1:1).

Indications:

NexGard® PLUS is indicated for the prevention of heartworm disease caused by *Dirofilaria immitis* and for the treatment and control of adult hookworm (*Ancylostoma caninum*, *Ancylostoma braziliense*, and *Uncinaria stenocephala*) and roundworm (*Toxocara canis* and *Toxascaris leonina*) infections. NexGard® PLUS kills adult fleas and is indicated for the treatment and prevention of flea infestations (*Ctenocephalides felis*) and the treatment and control of *Ixodes scapularis* (black-legged tick), *Rhipicephalus sanguineus* (brown dog tick), *Dermacentor variabilis* (American dog tick), *Amblyomma americanum* (lone star tick), and *Haemaphysalis longicornis* (longhorned tick) infestations for one month in dogs and puppies eight weeks of age and older, weighing four pounds of body weight or greater.

Dosage and Administration:

NexGard® PLUS is given orally once a month at the minimum dosage of 1.14 mg/lb (2.5 mg/kg) afoxolaner, 5.45 mcg/lb (12 mcg/kg) moxidectin, and 2.27 mg/lb (5.0 mg/kg) pyrantel (as pamoate salt).

For heartworm disease prevention, give once monthly for at least six months after last exposure to mosquitoes (see **Effectiveness**).

Dosing Schedule:

Body Weight (lbs.)	Afoxolaner Per Chewable (mg)	Moxidectin Per Chewable (mcg)	Pyrantel* Per Chewable (mg)	Chewables Administered
4 - 8	9.375	45	18.75	One
8.1 - 17	18.75	90	37.5	One
17.1 - 33	37.5	180	75	One
33.1 - 66	75	360	150	One
66.1 - 132	150	720	300	One
Over 132	Administer the appropriate combination of chewables			

*As pamoate salt.

NexGard® PLUS can be administered with or without food. Care should be taken to ensure that the dog consumes the complete dose and that part of the dose is not lost or refused. If a dose is missed, administer NexGard® PLUS and resume a monthly dosing schedule.

Heartworm Prevention:

NexGard® PLUS should be administered at monthly intervals year-round or, at a minimum, administration should start within one month of the dog's first seasonal exposure to mosquitoes and should continue at monthly intervals until at least six months after the dog's last exposure (see **Effectiveness**). When replacing another monthly heartworm preventive product, the first dose of NexGard® PLUS should be given within a month of the last dose of the former medication.

Flea Treatment and Prevention:

NexGard® PLUS should be administered year-round at monthly intervals or started at least one month before fleas become active. To minimize the likelihood of flea reinfestation, it is important to treat all animals within a household with an approved flea control product.

Tick Treatment and Control:

NexGard® PLUS should be administered year-round at monthly intervals or started at least one month before ticks become active.

Intestinal Nematode Treatment and Control:

NexGard® PLUS treats and controls adult hookworms (*Ancylostoma caninum*, *Ancylostoma braziliense*, and *Uncinaria stenocephala*) and roundworms (*Toxocara canis* and *Toxascaris leonina*). For the treatment of adult hookworm and roundworm infections, NexGard® PLUS should be administered as a single dose. Monthly use of NexGard® PLUS will control any subsequent infections. Dogs may be exposed to and can become infected with hookworms and roundworms throughout the year, regardless of season or climate.

Contraindications:

There are no known contraindications for the use of NexGard® PLUS.

Warnings:

Not for use in humans. Keep this and all drugs out of the reach of children. In case of accidental ingestion, contact a physician for treatment advice.

Keep NexGard® PLUS in a secure location out of the reach of dogs, cats, and other animals to prevent accidental ingestion or overdose.

Precautions:

Afoxolaner, one of the ingredients in NexGard® PLUS, is a member of the isoxazoline class. This class has been associated with neurologic adverse

reactions including tremors, ataxia, and seizures. Seizures have been reported in dogs receiving isoxazoline class drugs, even in dogs without a history of seizures. Use with caution in dogs with a history of seizures or neurologic disorders.

Treatment with fewer than six monthly doses after the last exposure to mosquitoes has not been evaluated and may not provide complete heartworm prevention.

Prior to administration of NexGard® PLUS, dogs should be tested for existing heartworm infection. At the discretion of the veterinarian, infected dogs should be treated with an adulticide to remove adult heartworms. NexGard® PLUS is not effective against adult *D. immitis*.

The safe use of NexGard® PLUS in breeding, pregnant, or lactating dogs has not been evaluated.

Adverse Reactions:

In a field safety and effectiveness study, NexGard® PLUS was administered to dogs for the prevention of heartworm disease. The study included a total of 272 dogs (134 administered NexGard® PLUS and 138 administered active control) treated once monthly for 11 treatments. Over the 330-day study period, all observations of potential adverse reactions were recorded. The most frequent reactions reported in the NexGard® PLUS group are presented in the following table.

Table 1: Dogs With Adverse Reactions.

Clinical Sign	NexGard® PLUS n = 134 Number (Percentage)	Active Control n = 138 Number (Percentage)
Diarrhea	9 (6.7%)	7 (5.1%)
Vomiting	6 (4.5%)	7 (5.1%)
Lethargy	3 (2.2%)	5 (3.6%)
Itching	3 (2.2%)	3 (2.2%)
Dermatitis	2 (1.5%)	1 (0.7%)
Anorexia	1 (0.7%)	4 (2.9%)
Muscle tremor	1 (0.7%)	1 (0.7%)

One dog in the NexGard® PLUS group was reported to exhibit muscle tremors along with nausea and depression for one day after the Day 0 treatment. The dog remained in the study and muscle tremors were not reported after any subsequent treatments.

Contact Information:

For a copy of the Safety Data Sheet (SDS) or to report suspected adverse drug events, contact Boehringer Ingelheim Animal Health USA Inc. at 1-888-637-4251 or www.nexgardforpets.com.

For additional information about adverse drug experience reporting for animal drugs, contact FDA at 1-888-FDA-VETS or www.fda.gov/reportanimalae.

Clinical Pharmacology:

Mode of Action:

NexGard® PLUS (afoxolaner, moxidectin, and pyrantel chewable tablets) contains the three active pharmaceutical ingredients afoxolaner, moxidectin, and pyrantel (as pamoate salt).

Afoxolaner is a member of the isoxazoline family, shown to bind at a binding site to inhibit insect and acarine ligand-gated chloride channels, in particular those gated by the neurotransmitter gamma-aminobutyric acid (GABA), thereby blocking pre- and postsynaptic transfer of chloride ions across cell membranes. Prolonged afoxolaner-induced hyperexcitation results in uncontrolled activity of the central nervous system and death of insects and acarines. The selective toxicity of afoxolaner between insects and acarines and mammals may be inferred by the differential sensitivity of the insects and acarines' GABA receptors versus mammalian GABA receptors.

Moxidectin is an endectocide in the macrocyclic lactone class. Moxidectin acts by interfering with chloride channel-mediated neurotransmission in susceptible parasites, which results in paralysis and death of the parasite.

Pyrantel is a nematocide belonging to the tetrahydropyrimidine class.

Pyrantel acts as a depolarizing, neuromuscular-blocking agent in susceptible parasites, causing paralysis and death or expulsion of the parasite.

Pharmacokinetics:

Following a single oral administration of a near-final formulation of NexGard® PLUS (at mean doses of 3.9 mg/kg afoxolaner, 18.8 mcg/kg moxidectin, and 7.8 mg/kg pyrantel pamoate) in fed and fasted Beagle dogs (10 to 21 months of age), afoxolaner and moxidectin were more rapidly absorbed in the fasted state with a time to maximum concentration (T_{max}) of 2 to 3 hours.

The afoxolaner mean maximum plasma concentrations (C_{max}) in the fed and fasted states were 1610 and 2200 ng/mL (CV=33 and 16%) and the moxidectin mean C_{max} values were 11.1 and 15.5 ng/mL (CV=39 and 24%), respectively. The area under the curve (AUC) for afoxolaner and moxidectin were similar between fed and fasted states. Post-dose pyrantel plasma concentrations were quantifiable out to 24 hours.

Following six oral administrations of NexGard® PLUS at 1, 3, and 5X the maximum exposure dose of 5 mg/kg, 24 mcg/kg, and 10 mg/kg afoxolaner, moxidectin, and pyrantel pamoate, respectively, every 28 days in 8-week-old Beagle dogs, afoxolaner and moxidectin T_{max} ranged from 2 to 6 hours. The observed mean C_{max} and AUC at steady state in the 1X dose group were 2230 ng/mL and 19000 days*ng/mL for afoxolaner and 14.8 ng/mL and 55.2 days*ng/mL for moxidectin, respectively. Based on mean C_{min}, afoxolaner and moxidectin accumulated by less than 4-fold at steady state. Afoxolaner and moxidectin exposure increased in a dose proportional manner between the 1X and 3X dose groups but was less than dose proportional in the 5X dose group.

Pyrantel pamoate is poorly absorbed into systemic circulation. Pyrantel pamoate is intended to remain in the gastrointestinal tract to allow effective concentrations to be delivered to gastrointestinal nematodes.

Effectiveness:

Heartworm Prevention:

In two well-controlled laboratory studies, NexGard® PLUS was 100% effective against induced *D. immitis* infections when administered for six consecutive months.

In a well-controlled US field study consisting of 120 dogs administered NexGard® PLUS and 124 administered an active control, no dogs treated with NexGard® PLUS tested positive for heartworm disease. All dogs treated with NexGard® PLUS were negative for *D. immitis* antigen and blood microfilariae at study completion on Day 330.

Flea Treatment and Prevention:

In a well-controlled laboratory study, NexGard® PLUS demonstrated ≥99.8% effectiveness against adult fleas 24 hours after weekly infestations for one month.

In a separate well-controlled laboratory study, afoxolaner alone began to kill fleas four hours after initial administration and demonstrated >99% effectiveness at eight hours.

In an additional well-controlled laboratory study, afoxolaner alone demonstrated 100% effectiveness against adult fleas 24 hours post-infestation for 35 days and was ≥93% effective at 12 hours post-infestation through Day 21 and on Day 35. On Day 28, afoxolaner alone was 81.1% effective 12 hours post-infestation. Dogs in both the afoxolaner-treated and control groups that were infested with fleas on Day -1 generated flea eggs at 12 and 24 hours post-treatment (0-11 eggs and 1-17 eggs in the afoxolaner-treated dogs, and 4-90 eggs and 0-118 eggs in the control dogs, at 12 and 24 hours, respectively). At subsequent evaluations post-infestation, fleas from dogs in the afoxolaner-treated group were essentially unable to produce any eggs (0-1 eggs), while fleas from dogs in the control group continued to produce eggs (1-141 eggs).

In a 90-day US field study conducted in households with existing flea infestations of varying severity, the effectiveness of afoxolaner alone against fleas on the Day 30, 60, and 90 visits compared with baseline was 98.0%, 99.7%, and 99.9%, respectively. In a second 90-day US field study, the effectiveness of afoxolaner alone against fleas on the Day 30, 60, and 90 visits compared with baseline was 97.5%, 99.7%, and 99.9%, respectively. Dogs in the second study with signs of Flea Allergy Dermatitis (FAD) showed improvement in erythema, alopecia, papules, scales, crusts, and excoriation following treatment, as a direct result of eliminating fleas.

Collectively, the data from the five studies (three laboratory and two field) demonstrate that NexGard® PLUS kills fleas before they can lay eggs, thus preventing subsequent flea infestations after the start of treatment of existing flea infestations.

Tick Treatment and Control:

In well-controlled laboratory studies, NexGard® PLUS demonstrated ≥97% effectiveness against *Amblyomma americanum* 72 hours post-infestation, for one month.

In well-controlled laboratory studies, a chewable containing afoxolaner alone, one of the active ingredients in NexGard® PLUS, demonstrated effectiveness against *Ixodes scapularis*, *Rhipicephalus sanguineus*, and *Dermacentor variabilis* at 48 hours post-infestation, and against *Haemaphysalis longicornis* at 72 hours post-infestation, for one month.

Intestinal Nematode Treatment and Control:

Elimination of adult roundworms (*Toxocara canis* and *Toxascaris leonina*) and hookworms (*Ancylostoma caninum*, *Ancylostoma braziliense*, and *Uncinaria stenocephala*) was demonstrated in well-controlled laboratory studies.

Target Animal Safety:

Margin of Safety:

NexGard® PLUS was administered orally at 1, 3, and 5X the maximum exposure doses at approximately 28-day intervals for six treatments to 8-week-old Beagle puppies. Dogs in the control group were sham-dosed. There were no clinically relevant, treatment-related effects on body weights, food consumption, clinical pathology (hematology, coagulation, serum chemistry, and urinalysis), gross pathology, histopathology, organ weights, or ophthalmic examinations. Mild, self-limiting diarrhea (with and without blood) was possibly related to treatment, as there were more incidences in the NexGard® PLUS groups than the control group throughout the study, including within 48 hours after treatment.

Avermectin-Sensitive Collie Safety:

NexGard® PLUS was administered orally at 1, 3, and 5X the maximum label dose to MDR1-deficient Collies once on Day 0, with a second administration to the 1X group on Day 28. Dogs in the control group were sham-dosed on Days 0 and 28. No clinical signs of avermectin toxicity were noted in any dog at any time during the study. Vomiting was observed in some dogs in the 3X and 5X groups and resolved without treatment. Diarrhea, with or without blood, was observed in some dogs in all of the NexGard® PLUS groups and resolved without treatment.

Heartworm-Positive Safety:

NexGard® PLUS was administered orally at 1X and 3X the maximum exposure doses at approximately 28-day intervals for three treatments to Beagle dogs with adult heartworm infections and circulating microfilariae. Dogs in the control group were sham-dosed. Diarrhea was observed in one dog in the 1X group and in three dogs in the 3X group, and vomiting was observed in two dogs in the 3X group. No signs of avermectin toxicity were observed at any time during the study. There were no clinical signs associated with death of the microfilariae observed in any of the dogs.

Field Safety:

In a well-controlled field study, NexGard® PLUS was used concurrently with other medications such as vaccines, antibiotics, non-steroidal anti-inflammatory drugs (NSAIDs), anesthetics, sedatives, analgesics, steroids, anthelmintics, antiemetics, and antipruritics. No adverse reactions were associated with the concurrent use of NexGard® PLUS and other medications.

How Supplied:

NexGard® PLUS is available in five strengths of beef-flavored soft chewables formulated according to the weight of the dog (see **Dosage and Administration**). Each chewable size is available in color-coded packages of 1, 3, or 6 chewables.

Storage Information:

Store in original package at or below 25°C (77°F) with excursions permitted up to 40°C (104°F).

Approved by FDA under NADA # 141-554

Marketed by: Boehringer Ingelheim Animal Health USA Inc., Duluth, GA 30096

Reach for Zen Reach for **Zenrelia™** (ilunocitinib tablets)

Find Your Zen

Visit our Zen garden to unwind with yoga, meditation, art therapy, and unique giveaways.

INDICATIONS: Zenrelia is indicated for control of pruritus associated with allergic dermatitis and control of atopic dermatitis in dogs at least 12 months of age.

IMPORTANT SAFETY INFORMATION: Read the entire package insert before using this drug, including the Boxed Warning. For Full prescribing information call 1 888 545 5973 or visit the Elanco Booth.

WARNING: VACCINE-INDUCED DISEASE AND INADEQUATE IMMUNE RESPONSE TO VACCINES. Based on results of the vaccine response study, dogs receiving Zenrelia are at risk of fatal vaccine-induced disease and inadequate immune response to vaccines. Discontinue Zenrelia for at least 28 days prior to vaccination and withhold Zenrelia for at least 28 days after vaccination. Dogs should be up to date on vaccinations prior to starting Zenrelia. Do not use in dogs less than 12 months old or dogs with a serious infection. Monitor dogs for infections because Zenrelia may increase susceptibility to opportunistic infections. Neoplastic conditions (benign and malignant) were observed during clinical studies. Consider the risks and benefits of treatment in dogs with a history of recurrence of these conditions. The most common adverse reactions were vomiting, diarrhea and lethargy. Zenrelia has not been evaluated in breeding, pregnant, or lactating dogs and concurrent use with glucocorticoids, cyclosporine, or other systemic immunosuppressive agents has not been tested. See the Elanco Booth for full prescribing information.

CONFERENCE SERVICES

WHERE TO EAT

Food and beverage service is available inside the Exhibit Hall (Monday-Wednesday), Bayside A-D and at various restaurants located in the Convention Center and surrounding hotels. Please pack your patience and plan accordingly; this is an extra busy time at Mandalay Bay Convention Center and guests may experience longer wait times for food and beverage services. Thank you for your understanding.

LUGGAGE STORAGE

Located at Bayside A.

Sun, March 2	6:00a-6:00p

MANDALAY BAY-EXCALIBUR TRAM

Guests staying at Excalibur and Luxor are strongly encouraged to use the Mandalay Bay tram system. Tram availability is subject to change. The one-way trip from Excalibur to Mandalay Bay Hotel is estimated at seven minutes, including the stop at Luxor, and is free.

LAS VEGAS MONORAIL

Las Vegas offers a quick and convenient monorail to explore the Strip, providing easy, inexpensive access to major attractions and hotels. Nine trains travel up to 50 mph, and passengers board every four to twelve minutes at each station.

For cost and more information, call 702.699.8200.

CONVENTION CENTER PARKING

Prices may be higher during special events.

Convention center parking is available at Mandalay Bay for a nominal fee.

MONDAY TO THURSDAY

Over 0 to 24 hrs \$20
Over 24 hours \$20 each additional day or fraction thereof

FRIDAY TO SUNDAY

Over 0 to 24 hrs \$25
Over 24 hours \$25 each additional day or fraction thereof

TAXI/RIDESHARE

Transportation is available at most hotels and are the recommended mode of transportation for efficient travel within the city. Lyft & Uber are available through your smart phone applications.

LOCAL BUS

Regional Transportation Commission of Southern Nevada (RTC) offers a transportation option along the Las Vegas Strip. The Deuce double-decker buses provide both economical and environmentally sound transit. Tickets can be purchased on the buses and at deuce ticket vending machines located at most bus stops. A 2-hour pass is \$6, a 24-hour pass is \$8 and a 3-day pass is \$20.

**VITICUS GROUP ANNUAL
INFORMATIONAL MEETING**

**VOTE FOR
CONTINUING
EDUCATORS
OF THE YEAR**

*Open to Viticus Group Members

Wednesday, March 5 ▶ 9:00–9:30a

Location: Mandalay Bay, Palm B, Level 3

Participants of the 97th WVC Annual Conference are eligible to vote for WVC 2025 Continuing Educators of the Year. The selected speakers will be recognized for their skills and contributions to the conference and veterinary profession. Select speakers by indicating your vote for the top presenter in each category when completing the session surveys.

BOARD OF DIRECTORS CANDIDATE BIOGRAPHIES

VICE PRESIDENT CANDIDATES

Dr. Miguel Ortiz

DVM, MID, DACVPM

Hello!

I am Dr. Miguel Ortiz, a small animal veterinarian from Pittsburgh, and am running for Vice President of the Viticus Group's Board of Directors. I have a solid academic foundation and diverse real-world experiences and am an excellent choice for this leadership role.

I graduated from the Purdue University School of Veterinary Medicine, hold a master's degree in public policy from the University of Pittsburgh, and am board certified by the American College of Veterinary Preventive Medicine. I have practiced in small animal clinics, non-profit shelters, and mobile and telehealth practices in Washington and Pennsylvania.

I am deeply moved by the transformative power of the human-animal bond. I am a committed volunteer for the Street Dog Coalition of Pittsburgh, an active member of the Pawsibilities Vet Med network, and I portray "Morph Mouse" for the League of VetaHumanz at Purdue.

As veterinary professionals, we celebrate a child's first kitten one day and respond to a food security crisis or a global pandemic the next. We are vital to the wellbeing of all communities and rise to this challenge through tenacity, innovation, and unending curiosity. The vibrant learning community nurtured by the Western Veterinary Conference is invaluable in this work. I am grateful for all that I have learned at WVC over the years and the lifelong friendships that I have found here. Your support in my campaign for the Vice Presidency would be an honor.

Dr. Megan Skeffington

DVM, MID, ACVPM

Dr. Megan Skeffington is a seasoned veterinary professional with a rich career dedicated to advancing veterinary medicine through education, mentorship, and professional development. With over 18 years of experience, she combines clinical expertise with a passion for supporting the veterinary team's wellbeing and fostering meaningful connections within the industry.

Dr. Skeffington has served on the Board of Directors for Viticus Group since 2020, contributing as Audit Committee Chair, Governance Committee member, and now as a candidate for Vice President in 2025. Through her leadership, she has helped shape vital initiatives aimed at enhancing veterinary education and addressing challenges faced by veterinary professionals. Her role as a speaker and moderator at events such as the WVC Annual Conference and the Recent Graduate Symposium along with other veterinary conferences such as AABP and VMX, underscores her commitment to advancing

communication and professional development across the industry.

Currently a senior Professional Services Veterinarian manager, Dr. Skeffington supports eight Professional Services Veterinarians, educating veterinary professionals in the East and South Central US, providing diagnostic education and mentoring veterinary teams. Her involvement in product innovation and communication strategy, particularly with initiatives like DecisionIQ and canine SNAP diagnostics, highlights her forward-thinking approach to veterinary care.

Her clinical background includes extensive experience in small animal medicine, advanced soft tissue surgery, and leadership roles at hospitals, where she improved operational performance, developed training programs, and fostered team growth. She is a Certified Compassion Fatigue Professional, emphasizing her dedication to mental health and wellness in the veterinary field.

Dr. Skeffington's deep-rooted passion lies in empowering veterinary professionals through knowledge, connection, and innovative solutions to ensure a thriving, resilient profession. As a Vice Presidential candidate for Viticus Group, she seeks to continue driving impactful change for the veterinary community.

VETERINARY DIRECTOR CANDIDATES

Dr. Lori Teller

DVM,
DABVP (canine/feline),
CVJ

Dr. Lori Teller is a graduate of Texas A&M University College of Veterinary Medicine (TAMU CVM) and a board-certified diplomate of the American Board of Veterinary Practitioners (ABVP) in Canine and Feline Practice. She worked at Meyerland Animal Clinic for many years and then joined the faculty at TAMU CVMBS where she is a Clinical Professor. Her major responsibilities are overseeing the College's telemedicine program and teaching in Primary Care, where she serves as chief of the service.

Dr. Teller has been very involved in the veterinary profession and is a Past-President of the Harris County and Texas Veterinary Medical Associations and was a recipient of the TVMA's Recent Graduate of the Year Award, as well as several President's Awards. In September 2019, she was honored with the Visionary Award by the Southwest Veterinary Symposium. Dr. Teller recently finished her service on the AVMA Board of Directors, culminating in her role as President. She also serves as an AVMA Ambassador, meeting with Congressional Representatives, and she has testified before the Presidential

Advisory Council to Combat Antibiotic-Resistant Bacteria (PACCARB) and the House Committee on Energy and Commerce, Subcommittee on Health. Currently, Dr. Teller is a Canine/Feline Regent for the ABVP and serves on ABVP's Board of Directors.

Dr. Teller has a monthly radio spot on Houston's NPR radio station where she highlights the importance of veterinary care and answers callers' question. She serves as an educator and mentor to many veterinary students, recent graduates, and young leaders, helping them navigate the complicated world of veterinary medicine and life beyond the boundaries of work. She is excited to have this opportunity to serve on the WVC Board of Directors.

Dr. Peter Weinstein

DVM, MBA

Dr. Peter Weinstein is a husband, father, pet parent, veterinarian and leader.

He has been involved with virtually all aspects of veterinary practice from a 15-year-old kennel kid to a hospital owner.

Organized veterinary medicine has been a passion as well with various roles and leadership and presidencies of Southern California VMA, California VMA, and Vet Partners.

He is a published author, most notably of the E-Myth Veterinarian-Why Most Veterinary Practices Don't Work and What to Do About It.

Currently, he is teaching business and finance at the Veterinary College of Western University of Health Sciences.

He likes to think of himself as a free-thinking change agent and disruptor who, because he has a daughter who is a recent graduate from veterinary school, is working for an even better veterinary profession in the future.

NexGard® COMBO
(esafoxolaner, eprinomectin, and
praziquantel topical solution)

IMPORTANT SAFETY INFORMATION:

NexGard® COMBO (esafoxolaner, eprinomectin, and praziquantel topical solution) is for topical use only in cats. Safe for use in cats and kittens 8 weeks of age or older, weighing 1.8 pounds or more. Use with caution in cats with a history of seizures or neurologic disorders. The most frequently reported adverse reactions include vomiting, application site reactions, lethargy, and anorexia. If ingested, hypersalivation may occur. Avoid direct contact with application site until visibly dry. For more information or for the full prescribing information, call 888-637-4251, or visit NexGardCombo.com.

NexGard® is a registered trademark and NexGard COMBO™ is a trademark of Boehringer Ingelheim Animal Health France, used under license.

THIS PERFORMANCE MAY CONTAIN STRONG LANGUAGE AND EXPLICIT CONTENT

EXHIBIT HALL

We are growing by leaps and bounds. The WVC Exhibit Hall will be Viticus Group's biggest one ever. Join us in one of the largest exhibit halls (566,323 sq. ft.) in the veterinary health industry.

For the first time ever, WVC is offering five learning hubs throughout the Exhibit Hall floor! Specifically, we have

two new hubs that can accommodate up to 300. You now have more options than ever for CE in the Exhibit Hall or throughout the convention center.

SION

NEW!

REGISTRATION LOCATION

NEW FOR 2025! All participant registration will be in **Bayside B on the first floor**. This includes registration, badge pickup, exhibitor check-in and Tech Zone.

NEW! First-timer or long-timer at WVC? Pick up your free WVC Participant Milestone button at registration (while supplies last).

EARLY SATURDAY BADGE PICK UP

Pick up your badge on Saturday and receive a free gift (Saturday only; while supplies last).

March 1
8:00a–6:00p

EXHIBIT HALL

LEARNING HUBS

After last year’s amazing success in immersive learning, WVC is bringing back The Western Frontier, The Pharmacy and The Joint (all learning hubs) for quick bites of educational knowledge. We are expanding the experiential learning opportunities with more seating for these unique learning sessions. Engage in arts and crafts as you learn; see schedule for upcoming activities.

ZEN GARDEN

Find your spot in the Exhibit Hall, stop by to unwind and recharge before your next session.

DOG HOUSE

Need a minute or 20 to decompress from the rigors of learning? Nuzzle with some adorable puppies in the Dog House.

VET TECH LOUNGE

Welcome to the Vet Tech Lounge – your exclusive spot to relax and recharge. Enjoy complimentary snacks and drinks from our sponsor, or simply unwind in a cozy, quiet space.

CAT CAFÉ

Need your daily kitten fix? Come join us at the Cat Café for some cuddles and coffee.

Sponsored by

CAREER CORNER

Complimentary professional headshots, LinkedIn profile reviews, and career coaching in one convenient location.

Sponsored by

VET DETECTIVE

A NEW ADVENTURE IS COMING!

See page 30 for details. Be sure to pick up your Vet Detective pocket map from the WVC info booth in the Exhibit Hall - it is your key to playing the game and there is not a digital option this year.

WVC CENTRAL

Returning for 2025! WVC Central will be the home of sponsored educational content presented by Zoetis on Monday and Tuesday and Boehringer Ingelheim on Wednesday. Join our sponsors for bite-sized education and updates on products.

EDUCATION PROGRAM

2025 EDUCATION PROGRAM & GUIDE

Participants must wear a conference badge at all times. Admission to education sessions is not allowed for guests and children under the age of 18. Guests who wish to attend educational program lectures must purchase a participant badge. Use the following session number prefix guide to assist your navigation of the 2025 Education Program.

CE CREDIT INFORMATION*

Full Conference Registration for Veterinarians with Labs	Up to 40 CE Hours*
Full Conference Registration for Veterinarians and Technicians without Labs	Up to 36 CE Hours
One-day Conference	8-9.5 CE Hours

Each 50-minute lecture provides one hour of CE credit. Please check with your respective state regarding the acceptance of hours spent inside the Exhibit Hall for continuing education credit.

CE CREDIT BY DAY*

Saturday, March 1	8 CE Hours*
Sunday, March 2	8.5 CE Hours* 8.5 CE Hours
Monday, March 3	9 CE Hours
Tuesday, March 4	9 CE Hours
Wednesday, March 5	9.5 CE Hours

*Includes hours obtained by purchasing hands-on labs or workshops (additional fees apply)

SESSION ID

SA Small Animal	IS Industry Seminar
EX Avian & Exotics	WS Workshop
FA Food Animal	HO Hands-on Laboratory
EQ Equine	EL Learning Hub
VT Veterinary Technician	NV NAARV Symposia
PM Practice Management	AAV AAV Symposium
S Symposium	

SPECIAL DESIGNATION ICONS

Veterinarian	Veterinary Technician
Practice Manager	Veterinary Student

*Additional fee applies.

Program current as of 1/30/25; subject to change. Please visit viticusgroup.org/wvc-conference for most up-to-date information.

CE CREDIT CALCULATIONS

25 minute sessions = 0.5 CE credit hour
50 minute sessions = 1 CE credit hour

Hands-on labs and workshops are accredited based on the hours attended. To qualify for your CE certificate, your badge must have been printed.

Practice Management track is approved for 65 CE units by VHMA

Viticus Group is an approved continuing education provider. Participants should be aware that some boards have limitations on the number of hours accepted in certain categories and/or restrictions on certain methods of delivery of continuing education. Individual participants are responsible for compliance to the policies of their individual state board.

Email Education@Viticusgroup.org for more information.

TRACKING SESSIONS FOR CE CREDIT/RECORD OF SESSIONS ATTENDED

We use badge-scanning technology to assist you in tracking the conference sessions you attend. Please enter the doorway nearest to the room signage to ensure that your attendance is recorded. Following the conference, you can access your record by visiting myviticus.wvc.org. Simply go to the 'My Records' tab, then click on 'Certificate' to view the recorded sessions. You are responsible for confirming that the sessions you attend comply with the state requirements where you are licensed. We do not track time in the Exhibit Hall for CE.

NEW SIDE QUESTS

Choose Your Quest | Attend The Sessions | Claim Your Badge

Your quest starts here, track your progress and claim your badge!

Use the checklist below to complete each quest, once all task have been completed for the desired badge visit Pawp Up to claim your physical badge.* Digital badges will also be provided after conference.

For full details on earning badges, visit viticusgroup.org/wvc-side-quests.

NEW! SILENT AUCTION

Opens March 2 at 10a | Closes March 4 at 9p
Mandalay Bay Foyer Level 2

Sports, Music and Entertainment Memorabilia
Trips and Experiences
AND MORE...

PROCEEDS BENEFIT
VETERINARY CONTINUING EDUCATION PROGRAMS

**Register before March 1
to claim \$20 Auction Bucks!**

Bid in person or online

Scan to Register and Bid

New Items Daily

* \$20 in Auction Bucks good towards the price of any trip or memorabilia item won for those who register for the auction before March 1.

VITICUSGROUP™
WVC ANNUAL CONFERENCE
MARCH 2 - 5, 2025 | LAS VEGAS, NV

Sponsored by:

Boehringer
Ingelheim

GLASS-BLOWING YOUR MIND

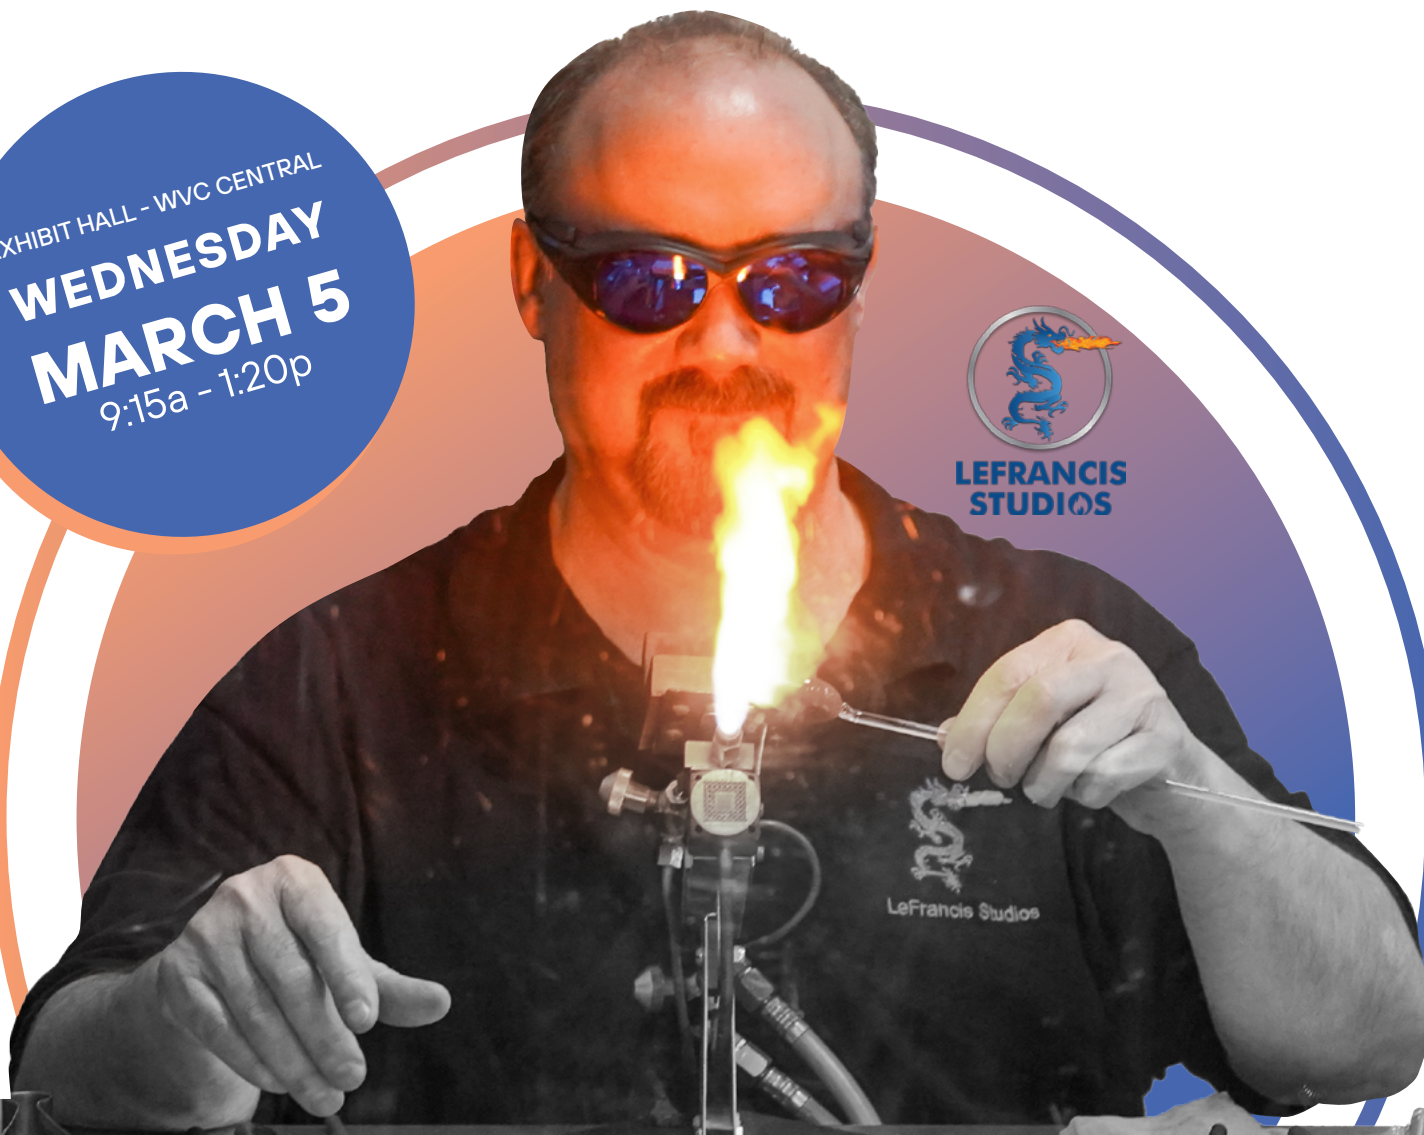

Chance to receive
a limited custom-
made blown glass
art!

Discover the art and science of cardiology with live glass-blown heart demonstrations and cutting-edge education on myxomatous mitral valve disease (MMVD) in dogs. Learn to evaluate evidence-based therapies and make stage-appropriate decisions to enhance patient outcomes.

EXHIBIT HALL - WVC CENTRAL
WEDNESDAY
MARCH 5
9:15a - 1:20p

LEFRANCIS
STUDIOS

SUNDAY • MARCH 2 • SMALL ANIMAL

UNLEASH The Power of Education

Join Zoetis at the
WVC Central Learning Lounge

**Maximize your time with two full days
of focused, 25-minute CE sessions in
the exhibit hall**

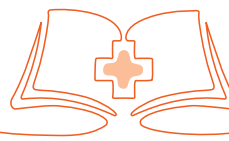

**Giveaway for
attending one session!**

When you attend one of the 25-minute Zoetis sessions, you'll receive a free GPS tracker keychain holder. In addition, you'll receive a free GPS tracker when you participate in 3 separate activities at the Zoetis booth (2055). **So be sure to visit both and get a complete set!**

**Explore the full medical
education schedule**

****Disclaimer:**** To qualify for a complimentary GPS Tracker, you must visit Zoetis Booth 2055 and engage with a minimum of three distinct areas (e.g., Trivia Game, Product Theater, or any product display area). To receive the silicone dog or cat tracker keychain holder, attendance at one Zoetis Learning Lounge session in the Central Learning Lounge, located in the exhibit hall, is required. Limit one set per person. Offer valid while supplies last.

q-r.to/WVC-2025

Reference Labs

- North America's largest reference lab network
- Core diagnostics, including hematology, chemistry, parasitology, microbiology, and clinical and anatomic pathology

In-House Diagnostics

- Most comprehensive in-clinic diagnostics portfolio on the market
- Innovative, accurate, and cost-effective core diagnostics including hematology, chemistry, immunodiagnostics, and parasitology
- Emergency and critical care diagnostics including blood, gases, and acid-base

Imaging Equipment

- Digital radiology for superior image quality and diagnostic capabilities
- A comprehensive, accessible ultrasound portfolio
- Advanced CT solutions for enhanced diagnostic precision

Imaging Services

- Telemedicine and AI-powered solutions
- On-the-spot interpretations of ultrasounds
- AI-powered interpretations of routine digital radiographs in just minutes in many circumstances

Check Out Our Sessions

Feline Fine: Feline Heartworm

Monday, March 3 | 8 – 8:50 a.m. | Room: Mandalay Bay A | Drs. Katie Krebs, Craig Prior, Kelly Mitchell, and Brad Ryan

Feline Fine: Communicating the Value of Wellness Testing for Cats

Monday, March 3 | 10 – 10:50 a.m. | Room: Mandalay Bay A | Drs. Holly Brown and Jason Coe

Feline Fine: Feline Giardia Updates: Emerging One Health Findings for Your Clinical Day-to-day

Monday, March 3 | 11 – 11:50 a.m. | Room: Mandalay Bay A | Drs. Christian Leutenegger and Michelle Evason

Feline Fine: Feline ID Po-PURR-i

Monday, March 3 | 2 – 2:50 p.m. | Room: Mandalay Bay A | Drs. Craig Prior, Julia Veir, Katie Krebs, and Brad Ryan

Next-Level Veterinary Care: Advancing Diagnostics and Efficiency with Telemedicine and RapidRead

Tuesday, March 4 | 8 – 8:50 a.m. | Room: Mandalay Bay A | Drs. Lisa Ziemer and Diane Wilson

Spectrum of Care Diagnostics: Critical Conversations About Complex Cases

Tuesday, March 4 | 10 – 10:50 a.m. | Room: Mandalay Bay A | Drs. Holly Brown and Jason Coe

Spectrum of Care Diagnostics: Chatting Options for Infectious Disease Testing with Pet Parents

Tuesday, March 4 | 11 – 11:50 a.m. | Room: Mandalay Bay A | Drs. James Barr, Jason Coe, Katie Krebs, and Kelly Mitchell

Spectrum of Care Diagnostics: CBC, CRP, and IHD– Oh My! Understanding Complicated Cases and Involving Clients in Diagnostic Decision-Making

Tuesday, March 4 | 2 – 2:50 p.m. | Room: Mandalay Bay A | Drs. Holly Brown, Brad Ryan, and Kelly Mitchell

Cancer Diagnostics: Innovations Across the Spectrum

Wednesday March 5 | 7 – 7:50 a.m. | Room: Mandalay Bay H | Drs. Sarah Beatty, Lisa Ziemer, Diane Wilson, Jennifer Willcox, & James Barr

Understanding Computed Tomography: A Practical Guide for the General Practitioner and Technician

Wednesday March 5 | 12:10 – 1 p.m. | Room: Mandalay Bay H | Dr. Kenneth R. Waller

SHAPING THE UNIQUE FUTURE OF PET HEALTH

Let's shape a brighter future for dogs and cats together. Start your journey with these Royal Canin-sponsored sessions at WVC 2025.

EDUCATION SESSIONS START
SUNDAY, MARCH 2

ROYAL CANIN LUNCHEON

**Tiny Patients, Big Innovations:
Optimizing a Team Approach
for Kitten Care**

Sunday, March 2, 2025
12:10 PM to 1:00 PM

FELINE HEALTH SYMPOSIUM

**Bowl Before Biopsy: The Value
of Dietary Intervention Before
Invasive Diagnostic**

Sunday, March 2, 2025
10:00 AM to 10:50 AM

**What's New with Feline Constipation:
Acute & Chronic Treatment Modalities**

Sunday, March 2, 2025
11:00 AM to 11:50 AM

**Nutrition & Enteral Feeding For the
Critical Cat**

Sunday, March 2, 2025
2:00 PM to 2:50 PM

LEARNING LOUNGE

**Genetic Testing Unleashed: Practical
Applications in Small Animal Medicine**

Tuesday, March 4, 2025
11:45 AM to 12:15 PM | 1:45 PM to 2:15 PM

VETERINARY TECHNICIAN SPONSORED TRACK: NUTRITION

**Call of Doody: Deploying Nutrition to
Strengthen the Fight Against Parvo**

Monday, March 3, 2025
8:00 AM to 8:50 AM

**Vet Tech GO! Catch All The Pet Food
Label Knowledge**

Monday, March 3, 2025
11:00 AM to 11:50 AM

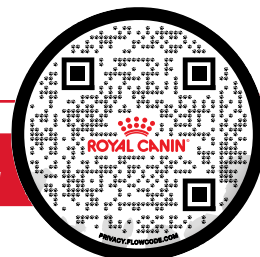

**The Hunger Games: How to Survive
Making a Diet Recommendation**

Wednesday, March 5, 2025 1
11:00 AM to 11:50 AM

**Achievement Unlocked: Launching
Technician Led Nutrition Counseling
Sessions**

Wednesday, March 5, 2025
2:00 PM to 2:50 PM

After the conference, continue learning with Royal Canin Academy

*Additional CE hours may be obtained by purchasing Hands-on Labs or Workshops. View the education program for a list of paid sessions.

The 97th WVC Annual Conference AAVSB RACE

- The mechanisms for certification and documentation of attendance are determined by the policies of individual state boards and are the compliance responsibility of the individual participant.
- Hands-on laboratories and workshops are accredited based on the hours attended.
- To qualify for your CE certificate, your badge must have been printed and will be scanned upon entry to sessions.

CE CERTIFICATE PRINTING

Your password-protected certificate of attendance will be available after the Annual Conference by logging into your account at myviticus.wvc.org. Forgot your password? Enter your email address where indicated, and it will be sent to you. No email access? Unable to print? Please email the Viticus Group office at support@viticusgroup.org to request a PDF certificate.

EXHIBIT HALL CE

Up to 2 CE hours. Contact your state for CE requirements.

SAFETY INFORMATION

Your safety is our first concern at Viticus Group. Although no emergency situation is anticipated, you should be aware of the following safety systems and procedures.

Alarm and Fire Detection Systems

Fire Detection: Mandalay Bay facilities are equipped with sophisticated electronic fire detection and alarm systems. State-of-the-art fire suppression systems control and extinguish fires of major consequence. Portable fire extinguishers are also strategically placed throughout the property.

Evacuation

If an emergency warrants evacuation of the Convention Center, its magnitude is confirmed by Mandalay Bay Security and communicated to Convention Center personnel. Announcements regarding any perceived emergency, regardless of severity, are played over the Convention Center public address system at three notification levels:

Initial emergency while the source of the problem is investigated (female voice) – no action required.

Non-emergency when the source of an alarm has been identified and the issue resolved (female voice) – no action required.

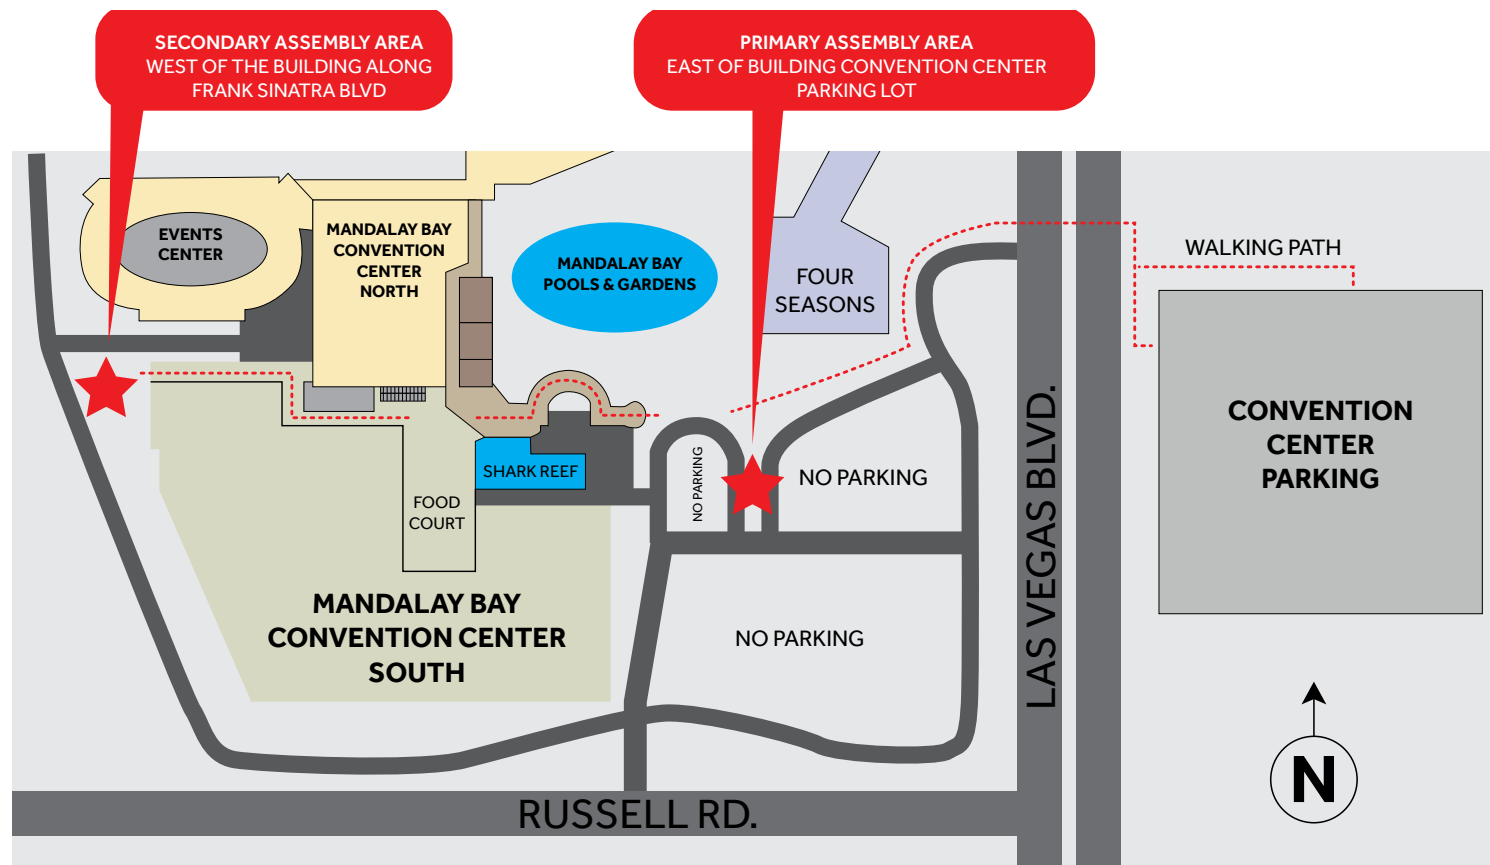

Evacuation when the source of an alarm has been identified as cause to evacuate the building (male voice) – evacuation required.

Evacuation Safety

- Remain calm and proceed in an orderly manner.
- Leave the facility through the nearest exit as instructed.
- Do not take time to retrieve personal property.
- Do not attempt to use elevators or escalators.
- Assist elderly and disabled persons.
- Listen for instructions via the public address system.
- Proceed directly to the designated assembly area located in the parking lot area, just outside the Shark Reef entrance (pictured below).
- Do not try to reenter the building until an "all clear" message is given.

Exits

Emergency exits throughout the Convention Center are clearly marked, and signs remain visible even during power outages.
