OTHER: The [Critter Fixers](#), Drs. Terrence Ferguson and Vernard Hodges, believe that if children are introduced to the veterinary profession early on, they will be more likely to pursue that career path. They created Vet for a Day to give future veterinarians an immersive look into the world of veterinary medicine, which is what Viticus Centers provide daily to veterinary professionals.

As powerful innovations alter the world of animal and human health, [Viticus Group](#) (formerly WVC) is the leading provider of educational programming and in-depth learning opportunities for veterinary and human health professionals. The Viticus Center offers continuing education at two cutting-edge campuses, presenting a variety of courses and providing access to specialized surgical training for both veterinary and human health professionals. Viticus Group's legacy signature event, the WVC Annual Conference, serves as the veterinary profession's premier gathering for innovative education and an opportunity to engage with other industry professionals seeking growth. Bringing together life and medicine in Viticus, we envision a future where all medical professionals have access to year-round, hands-on training for a one-of-a-kind experience.
